20. To help us better understand your pro-life position could you please tell us why you consider yourself to be pro-life, if you have pro-life qualifications that would be helpful for us to know and how you plan to use your elected position to support life.

What I recognize and know to be life, I recognize and know to exist after conception, in a baby inside a womb, a zygote, fetus or any other name or term used to refer or mean what exists after conception.

If elected, I have no plans to use the position of County Surveyor to support pro-life issues. The position of County Surveyor does not have any apparent impact on pro-life issues. If any issue relevant to the Office of County Surveyor became involved or embroiled in a circumstance such as drainage review/approval for site design or location of a section corner near a property where plans were to have an abortion facility, a crisis pregnancy center, or a right-to-life office, I anticipate conducting office operations and making decisions in the same manner regardless of the plans, regardless of the property owner, regardless of an anticipated property use, etc. I would further expect the same of all staff working in the office.

GOP platform topics, that I also support and consider to make me "pro-life" include the moral obligation against withholding food & water for persons, including terminally ill persons, as well as unplanned pregnancy support, father responsibility for unplanned pregnancy.

Your response to #20 will be used by the Right to Life of Northeast Indiana PAC to help determine endorsements, will be available to individuals on request and will be posted on our website, but will not be published in our voter education material because of space limitations.
